

G2 Deadman

Control System Components Elevated to a Higher Level

Advanced Engineering & Innovative Performance Features Designed into the NEW G2 Deadman

- Made from impact resistant materials that stand up to abusive conditions
- Response time reduced by over 30%
- Redesigned airflow reduces signal delay on long hoses
- Made to connect quickly and correctly every time
- New reversed hinge minimizes jams caused by dirt and debris
- Larger lever takes 67% less force to depress
- Can be changed easily for right or left hand operation

Axxiom has designed the new G2 to be the most durable and easiest to operate deadman on the market today.

Quality control components add to the performance of Schmidt blasting systems. The Schmidt G2 Deadman control has all the features and benefits most asked for by blast operators. The G2 offers an unbeatable combination of operator safety, unmatched performance, rugged durability and dependability.
